How to calculate hours worked

Hours worked = end time - start time - break. Example: 08:00 to 16:45 with a 45-minute break = 8.00 h.

Convert minutes to decimals by dividing by 60: 15 min = 0.25 h, 30 min = 0.50 h, 45 min = 0.75 h.

Prefer automatic totals? Use the free Excel version or track time with the TimeTrack app.
